ACTION
PACKED

Since the launch of CHATGPT in Nov 2022, there has been a sense of bewilderment amongst many of us: we have downloaded the different AI-related Apps and been testing, teasing, asking, creating, solving, chatting and trusting our new friend.

At Knowledge of the ART, we will not get entangled in with AI Automation and its surrounding hypes, but rather on the augmentation of human decision making and interactions. We want to take you to the plateau of productivity and show how we can:

- interpret events, support and automate decisions and be more time-efficient ...
- take more meaningful actions ...
- merge data: learn and unlearn ...
- combine probability and logic to assign a value to uncertainty ...
- integrate inference prediction with human cognition and reasoning ...

PRACTICAL
&
FOCUSED

The objectives of our seminar are:

- to show you the merger of our physical, social, virtual and digital worlds and its impact on our time schedules ...
- to overview must-know innovations in AI to add intelligence to previously static business applications and processes to become more time efficient ...
- to prepare ourselves for the forthcoming innovations like Responsible AI, Decision Intelligence, Knowledge Graphs and Intelligent Internet of Everything (IIOE) ...
